

System Architecture & Design Document

Project: KairoPro Architecture | **Author:** Lead Systems Engineer

1. Monorepo & Package Architecture

The repository uses Turborepo to split components into modular packages: apps/web (Next.js app), packages/core (AI agent & business logic), and packages/database (Prisma schemas & client).

2. Data Model & Entity Relations

- **Workspace & Organization:** Multi-tenant organization isolation.
- **Project & Inputs:** Requirement prompt storage, file attachment metadata, AI specification drafts.
- **Task & Activity Log:** Task state transitions, comments, assigned engineers.
